# Xerox Mobile Express Driver
## Quick, easy printing wherever you go

This breakthrough print solution makes it easy to find and use the right printer or multifunction system for your job, whether you're in the office or on the road. Print to any device in any location without tedious driver downloads and installations, or asking IT for help. Best of all, it's free, from Xerox.

## At home, on the road or in the office: The right device at the right time

- Automatically detects your location and updates your current printer list with preferred printers and multifunction systems for that location.
- Tells you instantly which devices are online and available to print, too.
- Sorts devices in your printer list based on status, location, name, etc.
- Displays detailed feature options to help you choose the best device for your job.*
- Works with Xerox and non-Xerox PostScript® printers and multifunction systems.

## One easy interface for all printers

- Automatically configures itself to offer users 100 percent of the features available in most Xerox printers and multifunctional systems when installed on the device.
- Provides a consistent, simple interface for all devices, making it easy to find and choose the features you need.
- Automatically puts most recently used device (for that location) at the top of your current printer list.
- Saves favourite printer settings for each application. Application Defaults allow you to set different default settings per application, i.e. MS Outlook can be defaulted to print one sided black and white but Adobe Acrobat could have colour and two sided printing.

## No need to call IT for help

- You can install Xerox Mobile Express Driver yourself, with a few mouse clicks.**
- No tracking down an IT technician to help you find the right device or driver, identify IP addresses or to install drivers in a new location.
- Dynamic printer discovery automatically updates your printer list with new features and status.*

\* Supported Xerox devices only
\*\* Administrator rights may be required

# Xerox Mobile Express Driver

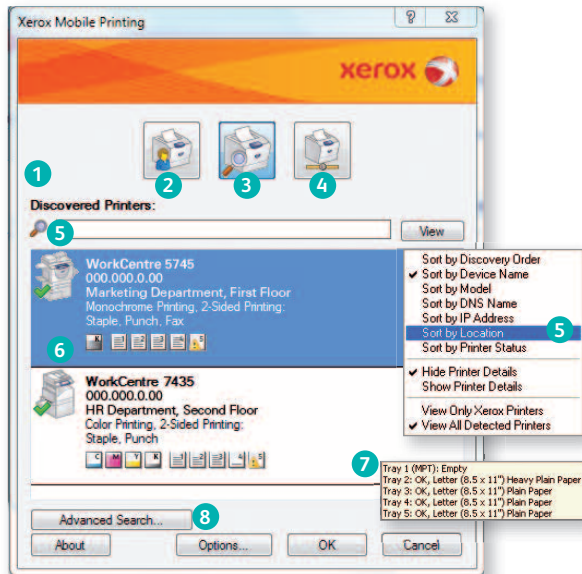

**1**
**Knows where you are**
Automatically detects your new or saved locations.

**2**

Roll over the icons to see detailed status views.*

**8**
**Expand your search**
Advanced Search tool lets you find devices beyond the local subnet.

**9**
**Configures itself**
Choose a device and X-MED automatically configures itself to use all available features installed on that device.*
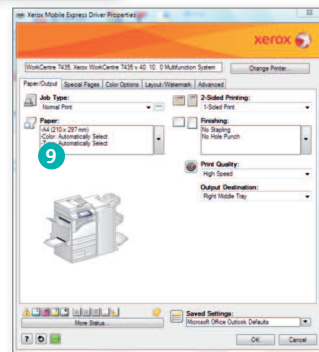

**10**
**Custom settings**
Automatically detects your current application and loads your favourite print settings for whichever device you use.**

## IT managers:
## Help your users help themselves

Xerox Mobile Express Driver (X-MED) eliminates IT handholding for mobile users. They can use printers or multifunction systems automatically, without the need to install new drivers or understand IP addressing. X-MED scans the local network and shows all available devices automatically, so users just chose the device they need.

The X-MED can identify new network connections and dynamically update the devices available to print too. It will also configure itself with any available options like extra trays and/or finishing capabilities*, avoiding several different driver installations and manual set-up of capabilities available.

\* Supported Xerox devices only
\*\* Feature loss may occur with non-supported devices

## Mobile users:
## Improve your mobile productivity

With X-MED, you'll never beg your hosts to print your documents again. Mobile Express Driver automatically makes the right devices available in any location you visit, and instantly provides at-a-glance, real-time information* on all devices available to you. You save time and enjoy increased productivity by knowing exactly which devices are available. The same easy-to-use interface allows you to choose feature options, and apply your usual application print settings, without asking IT for help.

## Office users:
## Office users can benefit, too!

For Office users who can also work from home with the same PC/Laptop, the X-MED can also pick up their home device without the need for installing another driver**. Whether connected Wireless, Network Cable or USB the X-MED can discover and print to that device. Even VPN connections are supported, so you can print to the machine in the office from home, ready for you to pick up the next day.
